- Operated and maintained school computer systems and related equipment.
- Managed student data, attendance records and examination results.
- Provided technical support to staff and students and maintained data security and backups.

PRACTICAL MOCK PROJECT

Small Business Accounting & Bookkeeping System — Independent Practice Project (Mock Case Study)

Built as a sample workflow based on a small-business management blueprint; this is a demonstration project, not claimed client employment.

- Designed a structured Excel/Google Sheets workflow to track daily sales, purchases, expenses, receivables and payables.
- Mapped customer, invoice, payment and order statuses to make outstanding items easier to follow up.
- Outlined a monthly reporting view for activity totals, unpaid balances, reconciliation notes and operational updates.
- Planned a simple process linking business records, customer follow-ups and management summaries for small shops, traders and home-based businesses.
